PROJECT REPORT: PLANT KNOWLEDGE QUIZ COMPETITION & SAPLING DISTRIBUTION

Professional Skills Module

#	Name of the Student	SA Number
1	M.A.Mahathir (Leader)	SA25610197
2	M.R.M.Thabith	SA25610239
3	S.G.B. Sathmira	SA25610103
4	M.H.I.Adahan	SA25610296
5	B.W.D.S. Wijenanda	SA25610068
6	K. Sriharan	SA25610001
7	M.W.Shahid	SA25610003
8	G.H.Dulaj	SA25610045
9	M.K.M.Shafky	SA25610026
10	M.I.A.Humaith	SA25610005
11	W.D.D.K.Wijesinghe	SA25610024

1. Introduction

As part of the Professional Skill Development module, our team is organizing a Plant Knowledge Quiz Competition for students and lecturers at SCU Turrent Tower Premises. Rather than a physical planting activity, this project focuses on raising environmental awareness through a fun, competitive quiz, with tree saplings distributed as prizes to the winners. This gives team members hands-on experience in event planning, coordination, and public engagement, while encouraging students to take a sapling home and grow it themselves.

2. Scope of the Project

The project covers designing quiz questions on plant and tree knowledge, organizing and hosting the quiz event at the SCU Turrent Tower Premises, registering student participants, judging and scoring, and distributing sapling prizes to the top winners. It also includes procuring saplings and prize materials and briefing winners on basic care instructions for their saplings. The scope is limited to a single quiz event and does not include any tree planting or site-based gardening activity by the team.

3. Quiz Competition Component

A plant/tree-themed quiz will be held at SCU Turrent Tower Premises, open to all interested students and lecturers. Questions will cover basic plant biology, local tree species, and environmental benefits of trees. Winners will each be awarded a tree sapling to take home and plant, encouraging personal ownership, environmental awareness, and continued care of their own plant beyond the event.

4. Professional Skills Developed

- **Plant & Tree Knowledge Research**: Compiling accurate, engaging quiz content on plant species and biology.
- **Event Planning & Coordination**: Organizing a competition from registration to prize distribution.
- **Public Speaking & Hosting**: Presenting questions and engaging student audiences confidently.
- **Budgeting & Resource Management**: Allocating funds for prizes, materials, and logistics.
- **Judging & Fair Assessment**: Scoring objectively and resolving disputes transparently.
- **Environmental Awareness**: Instilling plant-care knowledge and responsibility in winners.

5. Expenses

Item	Qty	Unit Cost (Rs.)	Total (Rs.)
Sapling prizes	30	630	19,000
Stickers	40	60	2400
Posters & Hosting Domain	9	95	850
Transport	-	-	3,500
Miscellaneous/contingency	1	-	3400

Total Expense: Rs. 29,150

6. Conclusion

This Plant Knowledge Quiz Competition offers a practical, low-cost way to raise environmental awareness among students while giving the team valuable experience in event planning, public engagement, and coordination. By rewarding winners with tree saplings, the project encourages a personal sense of responsibility and ongoing plant care beyond the event itself. With clear role allocation among the 11 team members and a well-defined budget, the team is confident of successfully executing this initiative and inspiring greater environmental consciousness among students.
